

FRACTIONALISED
WORLD

AROUND THE WORLD IN 80 DAYS

Campaign dates: 28 October 2026 – 15 January 2027

Please read these rules before participating. Official quest instructions and prize announcements provide operational details for each stage.

1

About the expedition

The Fractionalised World "Around the World in 80 Days" campaign runs from 28 October 2026 to 15 January 2027. Participants explore seven Wonder stages, complete verified quests, collect Passport achievements and take part in a community finale celebrating Fractionalised World as the 8th Wonder.

The campaign has 35 core quests: five for each of seven Wonders. The 8th Wonder finale is a separate milestone, not an eighth set of five standard quests. Completing a quest does not itself grant legal ownership of a real-world asset, a business, or project profits.

2

Dates and time

All deadlines use Greenwich Mean Time (GMT), unless an official event notice explicitly says otherwise. Published stage openings: Machu Picchu — 28 October 2026; Christ the Redeemer — 7 November; Chichén Itzá — 17 November; Taj Mahal — 27 November; Petra — 7 December; Great Wall of China — 17 December; Colosseum — 30 December.

The Great Wall build remains open until 15 January 2027. Giveaway eligibility closes at 23:59 GMT on 12 January 2027, when the eligible-participant list is frozen. The finale is planned for 15 January 2027; exact time and event schedule will be published separately.

3

Registration and safe participation

Register through the official campaign experience and accept the campaign rules. Use official links and keep account details accurate.

Never provide a seed phrase or private key. We recommend using a burner wallet for campaign activities rather than a wallet used to hold your main crypto assets. A wallet-control check may ask you to sign a message; read it carefully and do not sign a transaction you do not understand. Do not send funds to claim a prize unless official terms explicitly explain why and have been verified.

Spam, botting, fake accounts, harassment, impersonation, manipulation of invite or engagement metrics, duplicate entries and falsified evidence may lead to review, removal of invalid points or disqualification.

4

Quests, evidence and verification

Each Wonder has five core quests. Verification may use automated checks, platform records, public links, screenshots, other evidence or moderator review. Quest instructions identify required evidence and official post links.

A submission is not complete merely because it was sent. Points are awarded only after the required action is verified. Pending/action-required status may mean wait, retry or provide more evidence.

Where an integration fails, a retry or manual-review route should be provided where reasonably possible. A technical failure should not silently be treated as a failed quest. Keep your submission reference and contact the published support channel if needed.

Submissions must be genuine and attributable to the registered participant. Duplicate submissions earn no duplicate points. Corrected submissions use the timestamp of the corrected qualifying submission for race scoring.

5

Late completion and scoring

On-time verified quest completion earns 100 base points. A verified quest completed after its Wonder window but before the overall deadline earns 50 base points.

A speed bonus of up to 100 points declines over the published Wonder window, reaching zero at its deadline. No speed bonus is awarded after the window closes.

Each quest has a separate completion race: first valid finisher earns 100 bonus points, second 99, down to 1 point for 100th; 101st and later receive zero race bonus. Race position uses the qualifying completion timestamp ultimately verified, not moderator approval time. Identical timestamps are resolved by earlier server-recorded receipt sequence.

Maximum on-time score per core quest is 300 points; maximum late score is 150. The theoretical maximum across 35 core quests is 10,500 points. Invalidated completions may have points removed and rankings recalculated.

6

Passport stamps and Discord levels & Invites

A Wonder Passport stamp is issued only after all five quests for that Wonder are verified and the required on-chain achievement is confirmed. Pending or failed transactions are not confirmed stamps.

Discord progression supports community participation but does not replace quest verification or Passport confirmation. You will need to interact to confirm your XP and invite status. Top competitive leaderboard eligibility requires Discord Level 10 or higher (Early Dinosaur or above) at the eligibility snapshot.

7

Main leaderboard prizes and eligibility

Published prize structure: one Whale List wallet prize for the highest-ranked eligible participant; ten pre-sales whitelist places for the next eligible positions; four prizes of 2,500 SFRW; 20 Access NFTs; and 50 prizes of 500 SFRW. The separate Great Wall giveaway allocates 50,000 SFRW as described in section 8. The campaign prize announcement governs any valuation language. Any stated \$30,000 ecosystem NFT-package and token value is indicative and based on the referenced SFRW launch value of \$0.10; it is not a guarantee of token value or returns.

Top-three eligibility requires all 35 core quests verified; all seven compulsory sharing quests verified; all seven Wonder Passport stamps confirmed on-chain; Discord Level 10+ at cutoff, plus 10 invites verified; and compliance with published campaign and anti-abuse rules.

Leaderboard ranking uses total verified points across 35 quests. Ties resolve by most verified first-place quest finishes, then highest total speed-bonus points, then a documented random draw. The campaign team freezes the leaderboard eligibility snapshot at the published cutoff and validates it before announcing winners.

Main prizes use the My Passport Rewards & Claims action "Claim Campaign Prize". Winners may need to sign a message to prove wallet control. Never provide a seed phrase or private key. Main-prize claim deadlines will be stated in the official winner notice.

8

Great Wall community giveaway

The Great Wall giveaway uses 50,000 SFRW from the existing approved Quest and Airdrop/community allocation. This is a separate participation giveaway, not an additional main leaderboard prize. (See Tokenomics) and is separate from main leaderboard prizes.

Eligibility requires campaign registration by cutoff and at least one successfully added Great Wall brick. Each eligible participant receives one entry with equal odds. Brick count, timing, follower counts and sharing activity do not improve winning chances.

The draw uses a frozen eligible-participant list at 23:59 GMT on 12 January 2027. Validation is planned for 13–14 January, with winners announced on 15 January. Awards may be any whole-token amount from 100 to 1,000 SFRW, including intermediate amounts. Total awards never exceed 50,000 SFRW, unused balance remains in the existing approved allocation.

Winners use "Claim Great Wall Reward" in My Passport Rewards & Claims, verify wallet control by signing a message and explicitly claim. Claim window: 15 January through 15 April 2027. Unclaimed awards return to the existing approved Quest and Airdrop/community allocation and are not automatically reassigned.

9

Compulsory sharing and public posts

Each Wonder has one compulsory sharing quest, seven in total. Official post, required action and evidence route are shown in that Wonder's instructions. All seven must be verified for top-three eligibility.

Share only content you genuinely support and follow platform rules. Use disclosure wording specified in a task where applicable. A share is not a statement of guaranteed returns, token value or legal ownership of a real-world asset.

10

Fair play, moderation and appeals

The campaign may review suspicious activity, remove invalid points, exclude duplicate/fraudulent entries and disqualify participants who breach the rules. Decisions should be recorded and applied consistently. If you believe a decision is wrong, use the official support/appeal route and provide the quest ID and evidence reference.

11

Token information and no ownership

\$FRW is a digital token for ecosystem use and trading. Holding \$FRW or Access NFTs does not grant ownership of Fractionalised World Group businesses, real-world assets, projects or any entitlement to profits or revenues. Token value can go up or down and there is no guarantee of value or returns. Participate responsibly and only with what you can afford to lose.

12

Data, privacy and communications

Provide accurate details and keep them up to date. Personal data is used to administer the campaign and communicate with participants. By participating you accept the use of your information as described in the campaign's privacy notice. We will only contact you through official channels.

13

Changes, cancellations and force majeure

The campaign may update, pause or cancel the campaign, stages, quests or prizes due to technical, security, legal or other reasons beyond reasonable control. Where possible, material changes will be communicated via official channels.

14

Liability

The campaign and its team are not responsible for losses, costs or damages arising from participation, including technical issues, platform outages, third-party services or errors, unless caused by our proven negligence. Nothing in these rules limits liability that cannot legally be excluded.

15

Be careful... it's a jungle out there

Be alert to scams. Only use official links. Never share your seed phrase or private key. Do not send funds to claim a prize unless officially instructed and verified. If something looks suspicious, stop and check via the official support channel.
